

Innovative Solutions for Material Handling

AIR POWERED EX STACKER

CAPACITY: To 3,000 LBS.

CONTROLS: Pressure sensitive infinitely variable air valve, lever actuated.

POWER: Shop air supply or Internal pressure tank.

LIFT MOTOR: Air over Hydraulic for Reliability and Ease of Service.

PARKING BRAKE: Cam actuated, mounted on the side of the chassis.

CHASSIS: Unitized, all welded frame provides strength and durability.

OUTRIGGERS: Available in various widths to fit your application.

FORKS: Brass clad non-sparking for use in EX environments.

MODEL: HLW-EX-AIR Walkie EX Stacker 2,000 lbs. Capacity

RICO's air powered lift trucks allow use of powered equipment in "Class C" EX environments which are too hazardous for traditional gas or electrically powered EX equipment. By taking advantage of existing plant air supplies or a compressor located outside the EX environment, the vehicle can run continuously while tethered to the supply line or may be disconnected and draw air power from an internal pressure tank. This flexibility allows the vehicle to operate in locations otherwise inaccessible to powered equipment.

All RICO trucks are custom designed to meet each customer's specific application requirements. If you don't see what you need, ask for it. We are material handling problem solvers.

BPR/RICO Equipment, Inc.

WHY RICO . . .

All trucks exceed ASME B56-2000 specifications for safety.

All trucks exceed U/L-583 specifications for electrical safety.

Explosion proof trucks are certified by FMRC and/or UL for use in hazardous areas .

We utilize Military Standards in our designs.

Manufactured in the USA.

We only use domestic steel.

Utilize industry standard components. (GE, Allen Bradley, Curtis, Sevcon, Micro Switch)

All modular designs.

ISO-9001 compliant quality system.

On-site Tilt table to test truck safety requirements.

Technical manuals available in electronic format (CD-Rom)

The RICO Advantage . . .

RICO is proud to be one of few companies to be totally self sufficient in the Design, Fabrication and Assembly of its product. We do everything from steel plate burning down to the final painting and most everything in between! This eliminates dependency on outside sources since 95% of the work is performed in house. That translates into:

- * Quicker Product Deliveries
- * Flexible Production Schedules
- * Faster Response to Opportunities
- * High Quality Standards
- * Increased Equipment Reliability
- * Highest Level of Support

The RICO Sales and Engineering Departments . . .

RICO is committed to designing the most dependable application-designed lift trucks in the market today. Our sales department constantly thinks outside of the box, allowing us to look at your needs from a fresh perspective.

Our Engineering staff combines quality, durability and cost effectiveness, resulting in a vehicle that will surpass your requirements. We know you'll be pleased with your vehicle, because you will be an integral part of the design process. We assist local dealers as part of the proposal process to be sure we are addressing all of your operational, safety and performance issues.

Our designs are generated in house using the leading mainstream CAD solution Solidworks-2001. This allows us to evaluate more design alternatives, reduce errors, and enhance product quality.

About RICO Equipment, Inc . . .

RICO is the world's leading producer of specially engineered material handling equipment. With more than 125 years of experience in this industry, RICO has pioneered the design, development, and manufacture of material handling equipment with carrying capacities ranging from 3,000 LBS. to 300,000 LBS. The company's products are sold to a diverse customer base, which includes users in the industrial, commercial, and military markets. Headquartered in Medina, Ohio, RICO has manufacturing facilities in Ohio and West Virginia.

RICO is a family owned, privately-held company. The company was originally founded by industry leader Boyd Ross after successfully completing the startup of Schreck Industries. Today, RICO is managed by Boyd's son-in law David Mueller and his son Michael Ross.
