EX-60 SOLUTION

QUICK DELIVERY. SAFE SOLUTION. RELIABLE QUALITY.

Exposure to explosive gases and combustible dusts could result in a disastrous situation with non-compliant equipment. Industries such as Aerospace, Automotive, Chemical, Construction, Food, Paint, Pharmaceuticals, Plastics and more require the use of certified EX equipment. The Authority Having Jurisdiction, such as a Fire Chief or Fire Marshal, determines the hazard classification for any specific location and if an EX vehicle is required. The vehicle is built to UL 583 specifications and the enclosure has been hydrostatically tested by FRMC. Enjoy exceptional performance, unparalleled safety features as well as the quickest delivery in the industry.

DRIVE, PUMP AND ELECTRICAL ENCLOSURES house only electrical components and are approved to be included on EX-rated lift trucks. All RICO enclosures have been hydrostatically tested by FMRC for internal explosive resistance to pressures in excess of their requirement.

MINERAL INSULATED CABLES designed to meet needs of non-combustible, heat and water-resistant cable. Made of highly compressed mineral. The cables are sealed in a seamless copper tube, ensuring safety, making them liquid and gas tight. MI cabling provides flexibility and space saving.

We use **STATIC CONDUCTIVE STEERING TIRES** to insure no sparks, providing a safer working environment in a truck which does not create peril or hazardous conditions. Our Static Conductive tires are UL Certified.

The exposed components on the perimeter of the truck, including forks, are protected with brass and aluminum. This helps to **PREVENT ELECTRICAL FRICTION SPARKS**, which can ignite a truck. Both brass and aluminum are alloys which reduce heat and the possibility of sparking.

An **UNBLOCKED VIEW PROVIDES 360° VISIBILITY**, enhancing pedestrian and work safety.

Additional packages for **LED WORK LIGHTS, BLUE PEDESTRIAN LIGHTS** and **LED STROBE LIGHT** available.

- Cooling fans in the enclosure provide an extended run time, allowing for increased productivity.
- EX enclosure design allows for simple maintenance and serviceability, allowing easy access to components inside.
- Features an approved EX-rated battery box, eliminating the need for an EX battery and reduces out of pocket cost.
- To extend your Return on Investment for your vehicle, EX recertification is available through RICO.
- The EX-60 conversion is built with industry standard components that can be sourced through your local servicing dealer.
- Gradeability for this vehicle is 6% for one hour run time. Maximum grade rating is 19% at 5 minutes.

Approved for Operation in:

- Class 1, Division 1 & 2, Group D
- Class 2, Division 1 & 2, Group G
- Hazardous Environment
